

Applications are NOW open for the Roche Translational Cancer Research Fellowship

Roche Products (NZ) Ltd and the New Zealand Society for Oncology (NZSO) are delighted to be accepting applicants for the **2025 Roche Translational Cancer Research Fellowship**.

Creating an opportunity for our community to collaborate to bring the greatest benefit to New Zealanders impacted by cancer

"The Roche award is unique and tailored to NZ researchers and cancer specialists. It gives opportunities to connect, collaborate and drive forward research that benefits patients with cancer. It has enabled key cancer researchers in NZ, since 2016, to bring ideas to life. This award aligns perfectly with this year's conference theme 'Cancer and our Community'."

Dr Laird Cameron, Current NZSO President

HERE IS WHAT PAST PRESIDENTS OF NZSO HAVE TO SAY:

"The joy of the Roche Translational Fellowship is the support for NZ research teams made up by clinicians and scientists working together. The people with problems working with the people with the solutions. It's an opportunity for a team member to add a new skill that might leap-frog the team into a new way of thinking or working. It acknowledges that the research community in NZ is wide, and stretches from hospitals, to universities, to industry and is most effective when working in partnership."

Dr Ben Lawrence

"This is an unique opportunity to advance your translational cancer research to the next level, to help put your team at the forefront of research in New Zealand."

Associate Professor, Margaret Currie

"The Roche Award is unique. It recognises that true progress can only be achieved by collaboration and it focuses on people."

He aha te mea nui o te ao.

What is the most important thing in the world?

He tangata, he tangata, he tangata.

It is the people, it is the people, it is the people."

Dr Kate Clarke
